Applied Numerical Mathematics 8 (1991) 541–542
North-Holland

Author Index — Volume 8 (1991)

(The issue number is given in front of the page numbers)

Augenbaum, J., S.E. Cohn and **D. Marchesin**, Eliminating grid-orientation errors in alternating-direction implicit schemes (1) 1–10
Averick, B.M. and **J.M. Ortega**, Solution of nonlinear Poisson-type equations (6) 443–455

Belantari, A., Error estimate in vector Padé approximation (6) 457–468
Bramley, R. and **A. Sameh**, Domain decomposition for parallel row projection algorithms (4–5) 303–315
Breebaart, L.C., see **Paalvast, E.M.** (2) 177–192
Brezinski, C. and **M. Redivo Zaglia**, Construction of extrapolation processes (1) 11–23
Brezinski, C., Generalizations of the Christoffel–Darboux identity for adjacent families of orthogonal polynomials (3) 193–199
Burrage, K., The error behaviour of a general class of predictor–corrector methods (3) 201–216

Chan, T.F., W. E and **J. Sun**, Domain decomposition interface preconditioners for fourth-order elliptic problems (4–5) 317–331
Chan, T.F., see **Goovaerts, D.** (4–5) 389–410
Cohn, S.E., see **Augenbaum, J.** (1) 1–10

De Groen, P.P.N., Base-p-cyclic reduction for tridiagonal systems of equations (2) 117–125
Dorr, M.R., A domain decomposition preconditioner with reduced rank interdomain coupling (4–5) 333–352
Douglas, C.C., A tupleware approach to domain decomposition methods (4–5) 353–373
E, W., see **Chan, T.F.** (4–5) 317–331

Ewing, R.E., Application of domain decomposition techniques in large-scale fluid flow problems (4–5) 375–388

Gill, J., The use of the sequence $F_n(z) = f_n \circ \cdots \circ f_1(z)$ in computing fixed points of continued fractions, products, and series (6) 469–476
Goovaerts, D., T.F. Chan and **R. Piessens**, The eigenvalue spectrum of domain decomposed preconditioners (4–5) 389–410

Heroux, M.A., P. Vu and **C. Yang**, A parallel preconditioned conjugate gradient package for solving sparse linear systems on a Cray Y-MP (2) 93–115
Hoffmann, W. and **K. Potma**, Implementing linear algebra algorithms on a Meiko Computing Surface (2) 127–148

Jackiewicz, Z. and **E. Lo**, The numerical solution of neutral functional differential equations by Adams predictor–corrector methods (6) 477–491

Kaminski, M. and **A. Sidi**, Solution of an integer programming problem related to convergence of rows of Padé approximants (3) 217–223
Kulkarni, S.S., see **Singh, G.S.** (2) 163–175
Kwak, D., see **Rogers, S.E.** (1) 43–64

Lett, G.S., see **Mandel, J.** (4–5) 411–425
Levrie, P., G-continued fractions and convergence acceleration in the solution of third-order linear recurrence relations of Poincaré-type (3) 225–242
Lo, E., see **Jackiewicz, Z.** (6) 477–491

Magolu, M.-M., Conditioning analysis of sparse block approximate factorizations (1) 25–42
Mandel, J. and **G.S. Lett**, Domain decomposition preconditioning for p-version finite elements with high aspect ratios (4–5) 411–425
